PROFESSIONAL SUMMARY

Front-End and WordPress Developer with 5+ years of experience delivering responsive, high-performance websites for international clients. Skilled in HTML5, CSS3, JavaScript (ES6+), React.js, WordPress, and Elementor, with hands-on experience in REST API integration, basic PHP, and MySQL. Proven track record of 125+ completed projects spanning e-commerce, corporate, and portfolio sites. Strong background in website deployment, hosting and domain management, cPanel/server administration, SEO, and speed optimization. Combines a UI/UX design foundation with clean, maintainable code to build fast, accessible, cross-browser-compatible websites and deliver excellent client communication and support.

EXPERIENCE

UI/UX Designer & Front-End / WordPress Developer

2018 – Present

Jasper IT Pvt. Ltd.

- Developed and maintained responsive company and client websites using HTML5, CSS3, JavaScript, and WordPress, serving clients across 5+ countries.
- Built and customized WordPress themes with Elementor and WooCommerce, cutting site launch time and improving client satisfaction.
- Diagnosed and fixed cross-browser bugs and performance bottlenecks, improving page load speed and stability.
- Deployed and managed websites end-to-end: domain setup, hosting configuration, cPanel administration, and server management.
- Implemented on-page SEO and speed-optimization best practices, improving search visibility and Core Web Vitals scores.
- Supported international clients directly through requirements gathering, revisions, and post-launch maintenance.

Freelance Web & Graphic Designer

2022 – Present

- Delivered 125+ web and design projects independently, including responsive websites, UI/UX design, and branding for global clients.
- Designed and prototyped interfaces in Figma and Adobe XD, then translated designs into pixel-accurate, responsive front-end code.
- Managed full project lifecycle: client communication, Git-based version control, deployment, and hosting handover.
- Currently expanding into React.js development, applying component-based architecture and REST API integration to modern front-end builds.
